## PROFILE

I'm a self-taught full-stack web developer located in Istanbul. I have bachelors degree in industrial engineering and masters degree in economics. However, since I'm always keen on learning software development and interested in tech industry, I decided to switch careers to software engineering. Therefore in mid 2021 I started with learning the basics of web development. Then, I took various courses specialized in different aspects of web development. Thanks to all those learnings, now I can build full-stack web applications. Currently I'm looking for my first full time developer role. In the meantime I keep improving my developer skills.

## EDUCATION

### Kadir Has University

Industrial Engineering, BSc  
2013-2018

### Yıldız Technical University

Economics, MSc  
2019-2020

## PROJECTS

### Web Talks

[Visit Project](#)

Web Talks is a blog application where users can write articles about web development. Users must register and login first. Djoser is implemented to make authentication available. Users can read all articles, write a new article, comment on existing articles, and delete and update their own articles. Recently viewed articles are tracked. Users can also search articles and save articles to see them in saved articles section.

### Web Site of Büyükçekmece Volleyball Academy

[Visit Web Site](#)

Büyükçekmece Voleybol Akademisi Spor Kulübü is a local volleyball club in Turkey, Istanbul. This website is built for the club with using Wordpress and Elementor.

### To-Do App

[Visit Project](#)

A basic to-do list application where users can add, delete or update tasks for a certain date. Users must register and login first. Djoser is implemented to make authentication available. Users can mark tasks as completed or important.
